Julián Andrés Gaitán Hernández

Backend / Full-Stack Developer

Bucaramanga, Colombia | Available immediately · Fully remote

juliangaitan_h@hotmail.com | github.com/GaitanJulian | linkedin.com/in/gaitanjuliandev

PROFILE

Systems and Computer Engineering graduate with experience in full-stack web development, API integrations and technical evaluation of AI systems. Worked with Vue.js and Node.js on business applications, integrated conversational agents through the Meta/WhatsApp API, and maintained production software. International remote experience evaluating LLM-generated responses and code, executing tests and validating data quality.

PROFESSIONAL EXPERIENCE

Campuslands | Full-Stack Developer

May 2026 - November 2026 · Ended

Internship: May-June 2026. Formal employment: July-November 2026.

- Developed and maintained frontend and backend features with Vue.js and Node.js, implementing API integrations and business logic.
- Integrated conversational agents with WhatsApp through the Meta API to enable automated communication workflows.
- Participated in implementing and validating computer vision models for camera-based detection; diagnosed and fixed defects in production applications.

Invisible | Software Engineer - AI Trainer

July 2024 - September 2025 · Remote

- Evaluated LLM-generated responses and code against technical requirements and expected behavior.
- Executed test cases, reviewed and debugged code to identify logical errors, edge cases and functional failures.
- Checked accuracy, consistency and integrity of structured data; documented findings and technical feedback.

EDUCATION

Systems and Computer Engineering | Universidad Industrial de Santander (UIS)

Graduated · March 2026

SELECTED PROJECTS

Urban Map Bucaramanga - Event discovery platform for Bucaramanga with a public map, proximity filters, organizer publishing, editorial moderation and role-based access.

IncidentHub - Incident-management API and dashboard with JWT authentication, roles, service management, comments, filtering and audit-oriented middleware.

XR Medical Training Thesis - Programmed the complete XR application, interaction flow and training data capture; integrated an API to upload and export student information to the broader student application.
